- 14) *Wraparound Milwaukee Program Description*  
Bruce Kamradt, Director  
March, 2001  
"Wraparound Milwaukee is a unique system of care for children with serious emotional, behavioral, and mental health needs and their families. It utilizes a Wraparound philosophy and approach which focuses on strength-based and individualized care and combines it with a unique organizational structure from which it delivers a comprehensive and flexible array of services to these youth and their families..."  
"Wraparound Milwaukee is a publicly operated Care Management Organization (CMO). CMO's are types of managed care entities but differ in that they usually focus on providing their enrollees with a range of mental health, substance abuse, social and other supportive services rather than just focusing on health care only. All enrollees in a CMO usually have high levels of service needs versus managed care entities which focus on healthier populations that usually have many enrollees that use little or no health services. CMO's focus on meeting all the identified needs of the enrollees rather than rationing care and narrowing focus on what they will provide..."
